

DESCRIPTION

ENGINE FLUSH & CLEAN is a blend of chemical solvents, dispersants, and detergents that remove deposits (gum and varnish), keeping them suspended in the motor oil to be removed by the oil filter or at the next oil drain. Solvents and detergents in the product completely cleanse the interior of the engine from sludge, gum, rust and varnish. It helps remove accumulated sludge, varnish and carbon deposits from inside the engine and lubrication system thereby improving oil circulation for a smoother and cleaner engine operation.

BENEFITS

- Internally cleans and flushes the engine with highly effective cleaning agents
- Eliminates gums, varnish and sludge
- Helps maintaining cleaner engine parts
- Easily removed contaminants like carbon deposits, soot, water & residual fuel
- Reduces fuel consumption and exhaust emissions by restoring engine condition and enabling the fresh oil to perform optimally

DIRECTION FOR USE

1. Before changing oil, pour the contents of one bottle (300 ml) into the crankcase of the warm engine
2. Let the engine run for a maximum of 10-15 minutes, alternatively at low and high rpm. In case of any irregular engine behaviour: switch off the engine immediately and proceed with step 3
3. Drain the oil from the crankcase
4. Replace oil filter
5. Refill crankcase with fresh motor oil as per manufacturer's specifications
6. One bottle treats up to 8 liters of engine oil.

STORAGE INSTRUCTIONS & HEALTH, SAFETY AND ENVIRONMENT INFORMATION

All packages should be stored under cover to avoid the possible ingress of water and the obliteration of drum markings. Products should not be stored above 60°C. Health, safety and environmental information is provided for this product in the relevant Materials Safety Data Sheet, which can be obtained by contacting Gulf Western Oil on: 02 9673 9600. Dispose of any used or unused solution in accordance with the local, state and federal regulations.

ADD TO CRANKCASE
