

DESCRIPTION

DPF CLEAN & REGEN is an organo-metallic iron-based diesel fuel additive to be used as a catalyst for the regeneration of diesel particulate filters. DPF CLEAN & REGEN lowers the ignition temperature of soot collected in the diesel particulate filter and optimizes periodic combustion of accumulated soot. The unique combination of a clean fuel system, clean combustion with lower emissions and catalysed soot particles will clean up and assist in keeping the DPF, catalytic converter, exhaust gas recirculation system (EGR) as well as the turbo charger and its variable geometry vanes clean from deposits.

DPF CLEAN & REGEN supports the regeneration process and help maintain proper exhaust flow. Recommended for all common diesel engines with standard or retrofitted diesel particulate filter including common rail, turbo-charged engines.

BENEFITS

- Ensures trouble-free operation of your DPF-system
- Enables quick and complete soot combustion and regeneration
- Allows DPF to burn soot off at lower temperature and for shorter periods even in city/stop-start driving conditions
- Reduces emission of smoke, HC, CO and particulate matter
- Improves fuel economy due to fewer and shorter regeneration cycles
- Extends DPF and catalyst service life
- Prevent increase in oil consumption and loss of power due to clogged DPF

DIRECTION FOR USE

- Pour the entire contents (300 ml) into fuel tank before filling it with diesel fuel.
- Recommended to use 2-3 times per year or every 6000 – 7000km mileage
- One 300 ml bottle treats 60 liters of diesel fuel

STORAGE INSTRUCTIONS & HEALTH, SAFETY AND ENVIRONMENT INFORMATION

All packages should be stored under cover to avoid the possible ingress of water and the obliteration of drum markings. Products should not be stored above 60°C. Health, safety and environmental information is provided for this product in the relevant Materials Safety Data Sheet, which can be obtained by contacting Gulf Western Oil on: 02 9673 9600. Dispose of any used or unused solution in accordance with the local, state and federal regulations.

ADD TO **DIESEL** TANK

PACK SIZE. 24x300ML
